## **Executive Summary**

Total admissions, releases, and stock data, as well as, felony drug/narcotic abuse and alcohol violations for the Tennessee Department of Correction (TDOC) for fiscal year 2002/2003, July 1, 2002 through June 30, 2003 are summarized in this report.

Admissions can be categorized as a new commitment, a returned violator, a transfer from other jurisdictions, or a return escapee into a Tennessee Department of Correction (TDOC) facility or a local jail.

Releases can be categorized as conditional and unconditional releases.

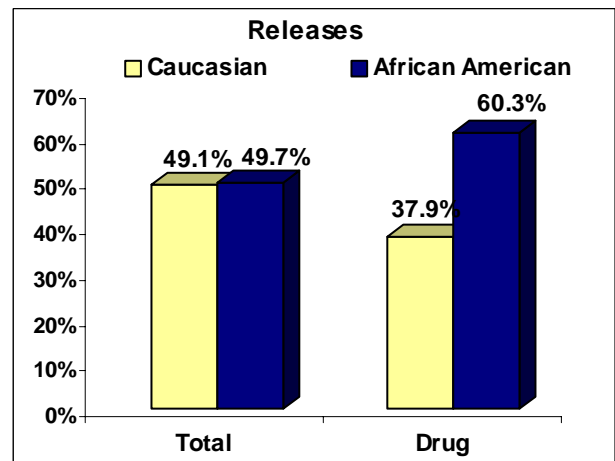

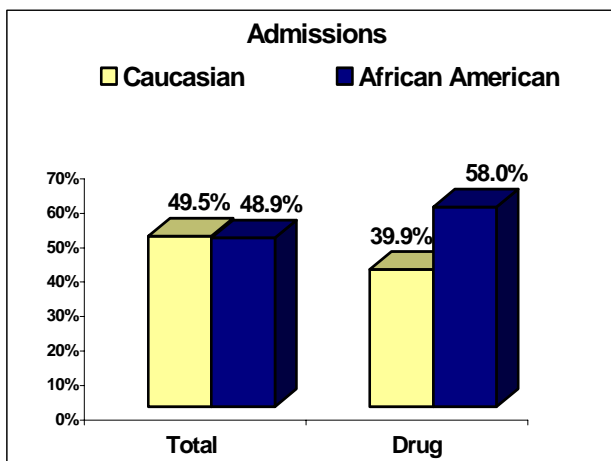

1. Conditional releases occur when an offender violates the conditions of release and can be imprisoned again for any of the sentences being served.
2. Unconditional releases occur only if the offender can't be imprisoned again for any of the sentences being served.

Stock is the total number of offenders under TDOC custody (TDOC and local facilities) on a specific day; June 30, 2003 was the date used for this report.

The offense data for total admissions, releases, and stock is the primary offense committed by an offender. A primary offense is considered the most serious offense when more than one offense is charged or adjudicated.

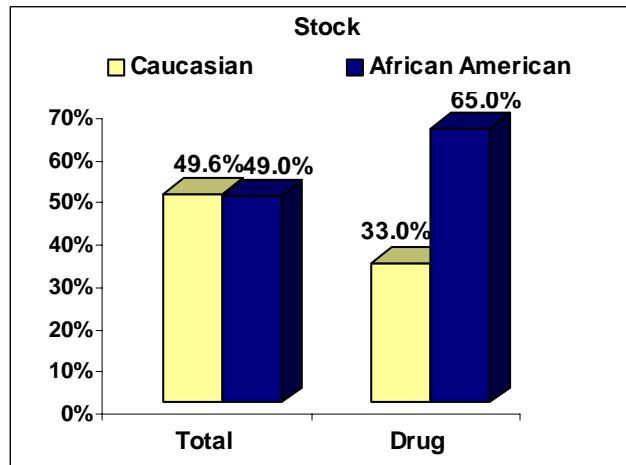

The offense data for felony drug type for admissions, releases, and stock is considered *any felony drug offense*; the offense does not have to be the primary offense committed by the offender. The drug offense is associated with the current incarceration, as long as an expiration of sentence has not occurred. If more than one drug offense is available, only the most serious drug offense is selected.

The race of the offender is evenly divided among Caucasian and African American when looking at total admissions, releases, and stock population.

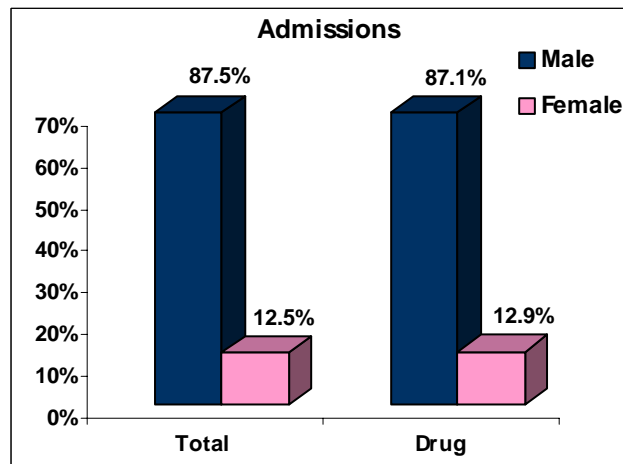

## Planning and Research Drug Brief

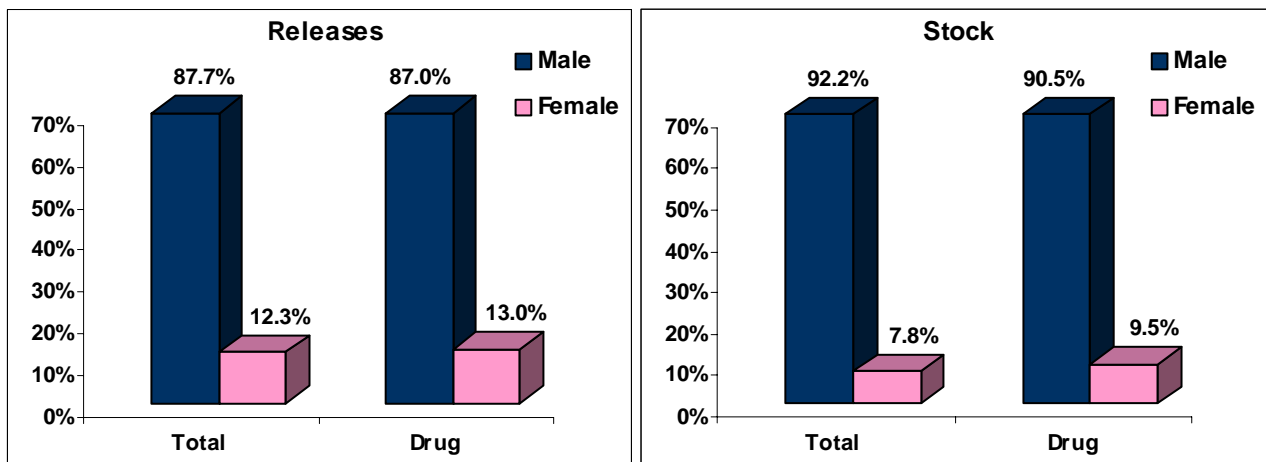

However, the majority of the population for felony drug admissions, releases, or stock is African American.

The male and female offenders for all admissions, releases, or the stock population are reflected in the felony drug admissions, releases, or stock population.

The numbers are very similar for both the total population and the felony drug population.

When looking at fiscal year 2002/2003, no one less than 18 years of age has been admitted, released, or is currently incarcerated for a felony drug offense.

## Planning and Research Drug Brief

The primary offense usually committed by an offender is a Drug/Narcotic offense. It does not matter if the offender was admitted or released from a local jail or a TDOC facility or is currently incarcerated in a local jail or a TDOC facility. When looking at felony drug admissions, releases, or stock population, Schedule II Cocaine is generally the most serious drug offense for an offender.

Shelby County is the county of conviction where the largest number of offenders commit their primary offense when looking at all admissions and the entire stock population. However, felony drug admissions and stock population offenses are committed more often in Davidson County.

### When an offender was admitted to a TDOC facility or a local jail

- Average sentence length is 6.1 years
- Average number of offenses is 2.8
- Average age is 32.2 years

### For a drug admission to a TDOC facility or a local jail

- Average sentence is 5.0 years
- Average number of offenses is 1.8
- Top five drug offenses committed (highest to lowest):

Offense	Description
1) 7429	Schedule II Drugs: Cocaine <1/2 Gram
2) 7421	Schedule II Drugs: Cocaine
3) 7426	Schedule VI Drugs: Not Less Than ½ oz.
4) 7422	Schedule II Drugs: Max \$100,000 Fine
5) 8039	DUI, 4 <sup>th</sup> Offense & Subsequent
- Top five unique offenses committed along with the drug offense (highest to lowest)

Offense	Description
1) 4122	Theft of Property - \$1,000-\$10,000
2) 8021	Habitual Traffic Offender
3) 7126	Possession Weapon – Convicted Felon
4) 3120	Aggravated Assault
5) 4924	Forgery – Up to \$1, 000
- About two thirds (66.95%) of the offenders most serious drug type is Schedule II Drugs
  - African Americans most serious drug type is
    - Schedule II Cocaine(76.6%), less than one-fourth of all other drug offenses are committed by African Americans
  - Caucasian most serious drug type is
    - Schedule II Cocaine 22.6%
    - Schedule II No Cocaine 20.8%
    - Alcohol 19.7%
  - When comparing gender Schedule II Drugs are the most serious drug type for both male and females offenders (66.9%)
  - Males most serious drug type is
    - Schedule II Cocaine 54.4%
    - Schedule II No Cocaine 12.6%
    - Schedule VI 12.1%
  - Females most serious drug type is
    - Schedule II Cocaine 47.0%
    - Schedule II No Cocaine 19.9%
    - Other Drugs 16.1%
- Average age is 32.5 years, however when you look at particular drug types, the following is noticed
  - Alcohol 40.5 years
  - Schedule VI 28.0 years

## Planning and Research Drug Brief

### **When an offender was released from a TDOC facility or a local jail,**

- Average time served is 3.2 years,
- Seventeen (17%) percent of all releases were readmitted to a TDOC facility or local jail,
- The average time to readmission is 185.4 days or 6.1 months,
- Offenders were readmitted due to a probation revocation (44.8%)

### **For a drug release from a TDOC facility or a local jail,**

- Average time served is 2.8 years,
- Sixteen (16.2%) percent of the entire drug releases were readmitted to a TDOC facility or local jail,
- The average time to readmission is 192.8 days or 6.3 months,
- Offenders were readmitted due to a probation revocation (40.9%)

### **When an offender was incarcerated on June 30, 2003 in a TDOC facility or a local jail,**

- The average sentence length was 12.0 years,
- Average time served was 3.7 years,
- For an average number of 3.8 offenses

### **For drug stock incarcerated on June 30, 2003 in a TDOC facility or a local jail,**

- The average sentence length was 6.4 years
- Average time served was 2.3 years
- For an average number of 2.1 drug offenses

## **Introduction**

Since the early 1980's, the number of persons incarcerated for a drug and/or alcohol related offense has significantly impacted policy and population growth in the Tennessee Department of Correction.

Criminology and criminal justice literature has repeatedly documented a high positive correlation between drug and/or alcohol dependency and criminal activity. In an effort to rehabilitate and prevent recidivism upon release, the Tennessee Department of Correction (TDOC) provides a continuum of cost-effective substance abuse treatment and programming services for incarcerated felons who have a history of being alcohol and drug dependent.

This document presents demographic, offense, and sentencing information to help in identifying new or existing trends for incarcerated felons with an alcohol and/or drug offense. This information assists the department and informs the various services and programs provided by the substance abuse treatment program.

In October 1991, a research brief entitled "Incarcerated Drug Offenders" was completed by TDOC's Planning and Research (P&R) unit. Information was given for TDOC admissions, releases, and stock population for fiscal year 1986/1987 through fiscal year 1990/1991 with a drug offense. An update of this brief was completed in October 2002, but only provided admissions data from fiscal year 1996/1997 through fiscal year 2000/2001. This document is a more exhaustive look at Tennessee's incarcerated felon population and establishes the groundwork for future research and analysis.

## **Methodology**

Total admissions, releases, and stock data, as well as, felony drug/narcotic abuse and alcohol violations for the Tennessee Department of Correction (TDOC) for fiscal year 2002/2003, July 1, 2002 through June 30, 2003 are summarized in this report.

In this research brief, the offense data for total admissions, releases, and stock was the primary offense committed by an offender. A primary offense is considered the most serious offense when more than one offense is charged or adjudicated.

The offense data for felony drug type for admissions, releases, and stock was considered *any felony drug offense*; the offense did not have to be the primary offense committed by the offender. The drug offense was associated with the current incarceration, as long as an expiration of sentence had not occurred. If more than one drug offense was available, only the most serious drug offense was selected. *Please see Appendix A for full listing of felony drug offenses.*

The data for this study was obtained from the Tennessee Offender Management Information System (TOMIS). Definitions for admissions and releases were obtained from the United States Department of Justice, Bureau of Justice Statistics, <http://www.ojp.usdoj.gov/bsj/>.

## **Definitions**

Basic definitions of drug related terms/facts are outlined in this section. Common and widespread drugs used by the general public are outlined in *Appendix I*.

Drugs are substances that affect the function of living cells, used in medicine to diagnose, cure, prevent the occurrence of diseases and disorders, and prolong the life of patients with incurable conditions.<sup>1</sup>

---

<sup>1</sup> "Drug," Microsoft® Encarta® Online Encyclopedia 2003, <http://encarta.msn.com> © 1997-2003 Microsoft Corporation. All Rights Reserved.

## Planning and Research Drug Brief

The term narcotics is applied primarily to the drugs known as opiates—compounds extracted from the opium poppy and their chemical derivatives. The most important attribute of narcotics is their capacity to decrease pain, not only by decreasing the perception of pain, but also by altering the reaction to it. Although they do have sedative properties when used in large doses, they are not used primarily for sedation.<sup>2</sup>

Alcohol applies to members of a group of chemical compounds and, in popular usage, to the specific compound ethyl alcohol, or ethanol. The word *alcohol* originally denoted any fine powder; the alchemists of medieval Europe later applied it to essences obtained by distillation, and this led to the current usage. Drug abuse is characterized by taking more than the recommended dose of prescription drugs such as barbiturates without medical supervision, or using government-controlled substances such as marijuana, cocaine, heroin, or other illegal substances. Many people also abuse legal substances, such as alcohol and nicotine.<sup>3</sup>

Federal, state, and local agencies enforce the laws pertaining to drugs and drug abuse; however, state and local authorities make most arrests. In 2001 the Federal Bureau of Investigation's Uniform Crime Reports (UCR) estimated that there were 1,586,900 state and local arrests for drug abuse violations in the United States.<sup>4</sup>

According to the UCR, drug abuse violations are defined as state and/or local offenses relating to the unlawful possession, sale, use, growing, manufacturing, and making of narcotic drugs including opium or cocaine and their derivatives, marijuana, synthetic narcotics, and dangerous non-narcotic drugs such as barbiturates.<sup>5</sup>

### **Admissions**

Admissions can be categorized as a new commitment, a returned violator, a transfer from other jurisdictions, or a return escapee into a Tennessee Department of Correction (TDOC) facility or a local jail.<sup>6</sup>

1. New commitment refers to any person entering prison directly from court for a new felony sentence. This category includes probation/community corrections violators entering prison for the first time from any unsuccessful period of supervision and persons who had prior incarcerations (misdemeanor or felony).
2. Returned violator refers to any person returned to prison for violating the conditions of his/her release or for committing a new offense while under supervision. Supervision can be parole, probation, or community correction.
3. Transfer from other jurisdictions refers to any person transferred from another jurisdiction to the jurisdiction of Tennessee to continue sentences already in force.
4. Return escapee refers to any person returned from an unlawful departure from a state correction facility.

<sup>6</sup> Convicted felons can serve their time in a local jail, but as felony offenders, under TDOC jurisdiction.

### **Admission Highlights for Fiscal Year 2002/2003**

- Total number of admissions - 12,967
  - TDOC facility 68.9%
  - Local jail 31.1%
- Three fifths (60.4%) of the admissions were new commitments
- The sex of the offender was
  - Male 87.5%
  - Female 12.5%
- The race of an offender admitted was evenly distributed between
  - Caucasian 49.5%
  - African American 49.0%
- The admission age of the offender ranged from 15 years to 81 years, the average age at admission was 32.2 years
- At the time of admission, the two most common primary offenses were
  - Drug/Narcotic 22.8%
  - Burglary 16.5%
- Most of the admitted offenders were convicted in Shelby County (22.7%)
- The average sentence length was 6.1 years for offenders
  - The average sentence length for an offender with a primary drug offense was 6.2 years
- Number of offenses committed by an offender ranged from 1 to 97 with an average number of 2.8 counts
- Twenty-one (21.1) percent of the offenders had drug offenses only
- At the time of admission, close to one-third (32.2%) of the offenders had at least one drug offense
- Over one-third (34.5%) of the admitted offenders committed a Felony Class C offense

For additional admissions data see Appendix B.

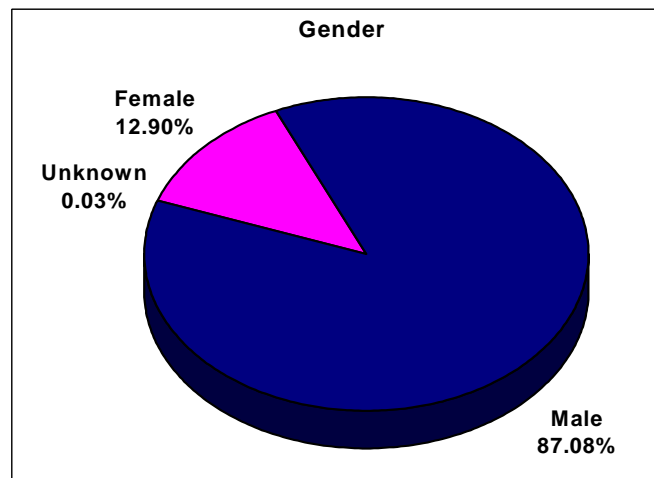

### **Drug Admission Highlights for Fiscal Year 2002/2003**

Drug/narcotic offenses were the most common primary offense for an offender admitted to a TDOC facility or local jail. At the time of admission, *any felony drug offense for this incarceration is considered a drug admission*. If more than one drug offense is available, only the most serious drug offense is selected.

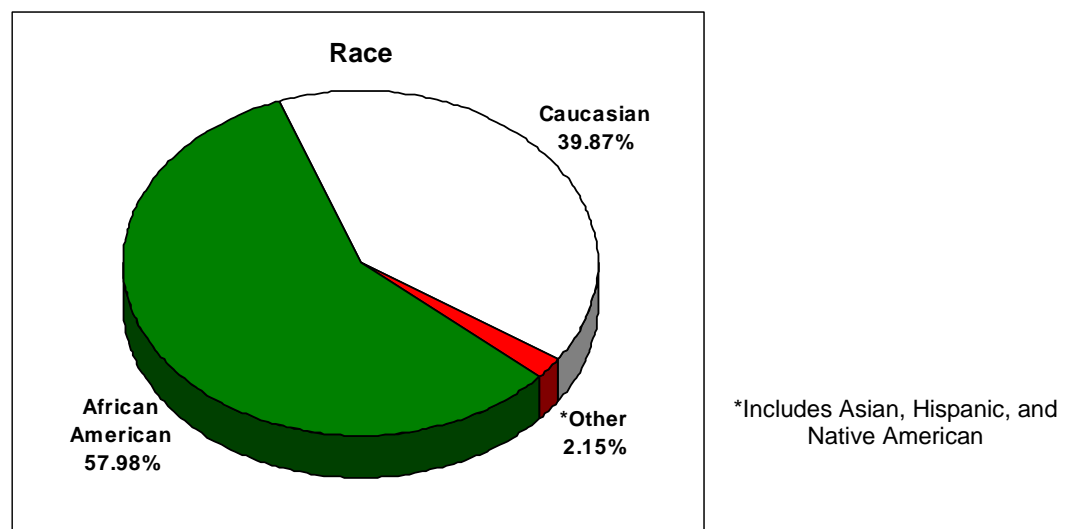

Drug Admission Type	Jurisdiction			
	TDOC	Local	Systemwide	%
<b>New Commitment</b>	<b>1,533</b>	<b>648</b>	<b>2,181</b>	<b>55.2%</b>
<b>Returned Violator</b>	<b>1,317</b>	<b>426</b>	<b>1,743</b>	<b>44.2%</b>
Parole Violator	512	94	606	15.4%
Probation Violator	585	271	856	21.7%
Community Corrections	220	61	281	7.1%
<b>Transfers from Other Jurisdiction</b>	<b>19</b>	<b>2</b>	<b>21</b>	<b>.5%</b>
<b>Returned Escapee</b>	<b>3</b>	<b>0</b>	<b>3</b>	<b>.1%</b>
<b>Total</b>	<b>2,872</b>	<b>1,076</b>	<b>3,948</b>	<b>100.0%</b>

## Planning and Research Drug Brief

- Thirteen (13.1%) percent of the drug admissions were female and eighty-seven (86.8%) percent of the drug admissions were male.

- The race of the majority of drug admissions was African American (58.1%). This is in contrast to the total admission numbers. Caucasian (49.4%) and African American (49.0%) felons were evenly admitted to a TDOC facility or a local jail.

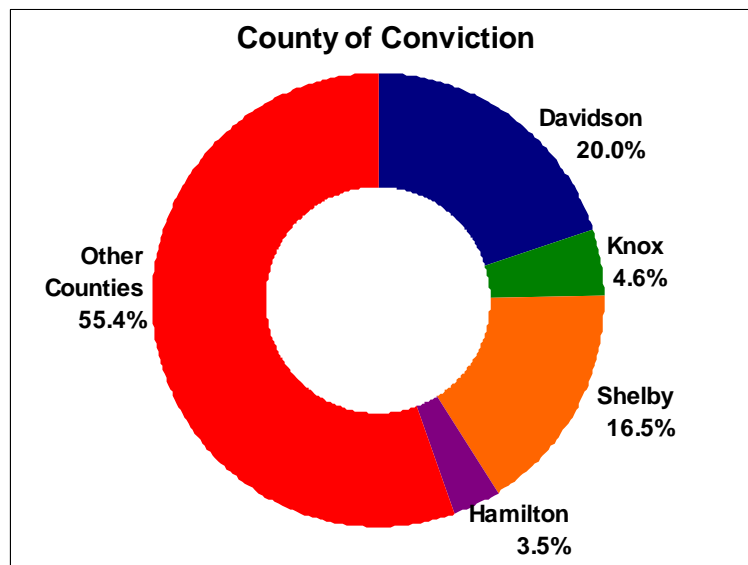

- The age for a drug admission ranged from 18 years to 75 years, the average age for a drug admission was 32.5 years.

Age Group	Number	Percentage
18-19	80	2.0%
20-29	1,700	43.1%
30-39	1,206	30.6%
40-49	783	19.8%
50+	177	4.5%
	3,948	100.0%

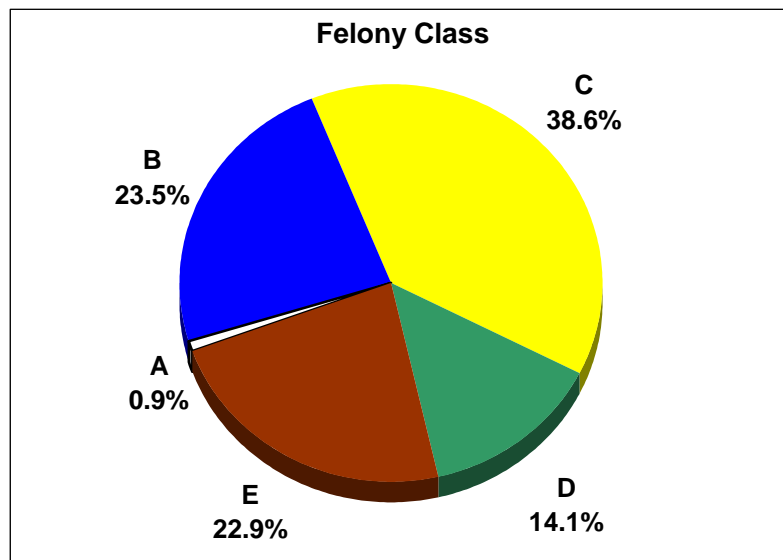

- The majority of drug admissions were sentenced to TDOC
  - TDOC 72.6%
  - Local Jail 27.4%

## Planning and Research Drug Brief

- The four major counties accounted for forty-five (44.6%) percent of drug admissions in Tennessee

- Felony class of drug admissions

Class	Number
A	36
B	926
C	1525
D	556
E	905

- The total number of offenses committed by an offender ranged from 1 to 68 with an average number of 2.5 counts
- The total number of drug offenses committed by an offender ranged from 1 to 46 with an average number of 1.8 drug counts
- The average sentence for a drug offense was 5.0 years

## Planning and Research Drug Brief

- Schedule II Drugs were preferred by offenders

Type	Number	%
Alcohol	349	8.84%
Schedule I	50	1.27%
Schedule II	2645	67.00%
No Cocaine	534	13.53%
Cocaine	2,111	53.47%
Schedule III	35	.89%
Schedule IV	63	1.60%
Schedule V	1	.03%
Schedule VI	452	11.45%
Other	353	8.94%

See Appendix C for a more exhaustive explanation of Drug Types

- Ranking the types of drug offenses according to race of the offender

Type	Rank		
	Race		
	Caucasian	African Am.	Other
Alcohol	3	5	4
Schedule I	7	6	4
Schedule II			
No Cocaine	1	2	5
Cocaine	2	1	1
Schedule III	8	8	N/A
Schedule IV	6	7	5
Schedule V	N/A	9	N/A
Schedule VI	4	3	3
Other	5	4	2

- The ten most unique drug offenses for a drug admission (highest to lowest)

Offense	Description
1. 7429	Schedule II Drugs: Cocaine <1/2 Gram
2. 7421	Schedule II Drugs: Cocaine
3. 7426	Schedule VI Drugs: Not Less Than ½ oz.
4. 7422	Schedule II Drugs: Max \$100,000 Fine
5. 8039	DUI, 4 <sup>th</sup> Offense & Subsequent
6. 7452	Schedule II Drugs: Attempt. Max. \$100,000 Fine
7. 7424	Schedule IV Drugs: Max. \$50,000 Fine
8. 7687	Obtain Drugs by Fraud
9. 7458	Schedule II Drugs: Attempt. Cocaine < ½ Gram
10. 7488	Schedule II Drugs: Facilitation. Cocaine < ½ Gram
7625	Counterfeit Controlled Substance

- The ten most unique offenses committed with a drug admission (highest to lowest)

Offense	Description
1) 4122	Theft of Property - \$1,000-\$10,000
2) 8021	Habitual Traffic Offender
3) 7126	Possession Weapon – Convicted Felon

Planning and Research Drug Brief

- 4) 3120 Aggravated Assault
- 5) 4924 Forgery – Up to \$1, 000
- 6) 6624 Failure to Appear
- 7) 4422 Aggravated Burglary
- 8) 4123 Theft of Property - \$500-\$1,000
- 9) 5005 Evading Arrest (Flight)
  - 3121 Reckless Endangerment – Deadly Weapon Involved
- 10) 3420 Robbery

*See Appendix D for additional drug admissions data.*

## **Releases**

Releases may be categorized as conditional and unconditional releases.

1. Conditional releases occur when an offender violates the conditions of release and can be imprisoned again for any of the sentences being served.
  - Parole is a period of conditional community supervision following a prison term. If the conditions are violated, the parolee can be returned to prison to serve any of the remaining portion of the sentence.
  - Probation is an act of clemency, whereby the convicted offender is released into the community under supervision in lieu of incarceration. For this purpose the offender must agree to specific standards of conduct; If the offender violates, the conditions, he/she is subject to revocation.
  - Community correction is a grant program created in 1985 as an alternative to incarceration. Programs are developed based on the individual needs of the area served. Violation of the conditions subjects the offender to revocation.
  - A transfer to other jurisdiction refers to any offender moved from one state's jurisdiction to another state's jurisdiction to continue sentences already in force.
2. Unconditional releases occur only if the offender cannot be imprisoned again for any of the sentences being served.
  - Expirations of sentence are the completion of maximum court sentences minus credits. These releases are not predicated on any form of community supervision.

### **Release Highlights for Fiscal Year 2002/2003**

- Total number of releases – 12,723
  - TDOC 4,768
  - Backup 3,330
  - Local jail 3,723
  - Other /Unknown 902
- The sex of the offender was
  - Male 87.7%
  - Female 12.3%
- The race of the offender was evenly distributed between
  - Caucasian 49.1%
  - African American 49.7%
- The age range of an offender released from TDOC or a local facility was 16 years to 82 years, the average age for a released offender was 33.4 years.
- Thirty five percent of the releases were unconditional releases
  - Expiration of Sentence 35.1%
- Sixty-five percent of the releases were conditional releases
  - Probation 31.9%
  - Parole 23.3%
  - Community Correction 8.4%
  - Other jurisdictions 1.4%
- A Drug/Narcotic offense (22.1%) was the most common primary offense for an offender released from a TDOC facility or local jail
- The average time served for a released offender was 3.2 years

## Planning and Research Drug Brief

- The offenders with a conditional release (parole, probation and community corrections) were released to
  - Davidson County 16.0%
  - Hamilton County 3.6%
  - Knox County 6.0%
  - Shelby County 19.2%
  - Other Counties 35.2%
  
- Seventeen (17%) percent of the offenders released for all criminal offenses were readmitted to TDOC or a local facility
  - Within 1 month 2.9%
  - Within 3 months 14.9%
  - Within 6 months 35.5%
  - Within 9 months 27.9%
  - Within 12 months 13.8%
  - Within 18 months 5.0%
  
- The length of time an offender was readmitted to TDOC or a local facility range from 1 month to 16 months, the average time for readmission was 185.4 days or 6.1 months.
  
- The offenders were readmitted due to
  - Probation revocation 44.8%
  - Parole revocation 22.0%
  - Community Correction 17.0%
  - New admission 15.8%
  - Other .4%

*For more Release data see Appendix E.*

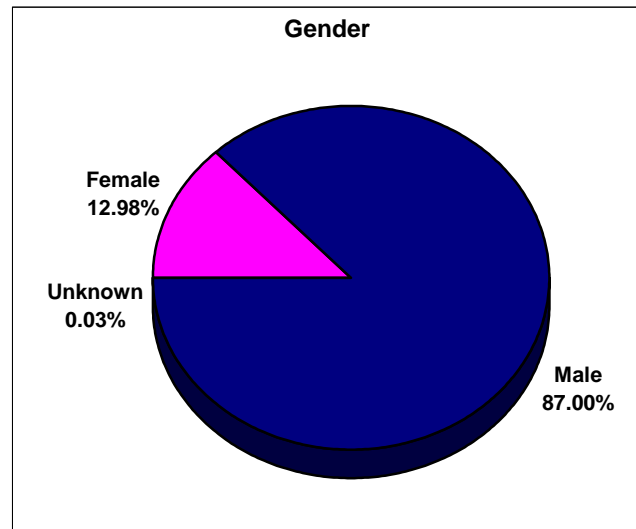

## **Drug Releases Highlights for Fiscal Year 2002/2003**

Drug/narcotic offenses were the most common primary offenses for offenders when released from a TDOC facility or local jail. At the time of release, *any felony drug offense for this incarceration is considered a drug release*. If more than one drug offense is available, only the most serious drug offense is selected.

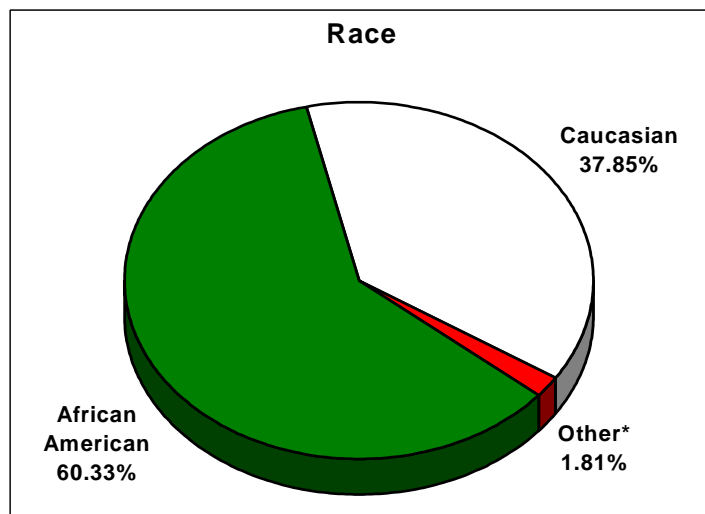

Drug Release Type	TDOC	Backup	Local	Systemwide	%
Expiration of Sentence	429	244	444	1,127	28.8%
Parole	788	180	119	1,088	27.8%
Probation	249	494	433	1,209	30.9%
Community Corrections	7	139	36	430	11.0%
Transfer to Other Jurisdiction	2	52	7	61	1.6%
<b>Total</b>	<b>1,475</b>	<b>1,109</b>	<b>1,039</b>	<b>3,915</b>	<b>100.0%</b>

## Planning and Research Drug Brief

- About thirteen (12.98%) percent of the drug releases were female and eighty-seven (87.00%) percent of the drug releases were male.

- The majority of drug releases were African American (60.3%) offenders. African Americans also made up the majority (58.0%) of drug admissions during fiscal year 2002/2003.

\*Includes Asian, Hispanic, and Native American

- The age for drug releases ranged from 18 years to 80 years, the average age for a drug release was 33.6 years.

Age Group	Number	Percentage
18-19	31	.8%
20-29	1,537	39.3%
30-39	1,285	32.8%
40-49	855	21.8%
50+	207	5.3%
	3,915	100.0%

## Planning and Research Drug Brief

- Two thirds (66.9%) of the drug releases were Schedule II Drugs offenses

Type	Number	%
Alcohol	319	8.15%
Schedule I	48	1.23%
Schedule II	2620	66.92%
No Cocaine	410	10.47%
Cocaine	2,210	56.45%
Schedule III	38	1.00%
Schedule IV	81	2.07%
Schedule V	2	.03%
Schedule VI	473	12.08%
Other	334	8.53%

- The average time served for drug releases was 2.8 years.
- The drug offenders (2,730) with a conditional release (parole, probation and community corrections) are released to
  - Davidson County 17.6%
  - Hamilton County 2.9%
  - Knox County 5.2%
  - Shelby County 12.3%
  - Other Counties 62.1%
- Sixteen (16.2%) percent of the drug offenders released were readmitted to TDOC or a local facility
  - Within 1 month 2.7%
  - Within 3 months 15.2%
  - Within 6 months 33.8%
  - Within 9 months 25.8%
  - Within 12 months 15.6%
  - Within 18 months 7.0%
- The length of time a drug offender was readmitted to TDOC or a local facility range from 3 months to 15 months, the average time for readmission was 192.8 days or 6.3 months.
- The drug offenders are readmitted due to
  - Probation revocation 40.9%
  - Parole revocation 25.1%
  - Community Correction 21.5%
  - New admission 12.5%

*For additional drug release data see Appendix F.*

## **Stock**

Stock is the total number of offenders under TDOC custody (TDOC institutions and local facilities) on a specific day; June 30, 2003 was used for this report.

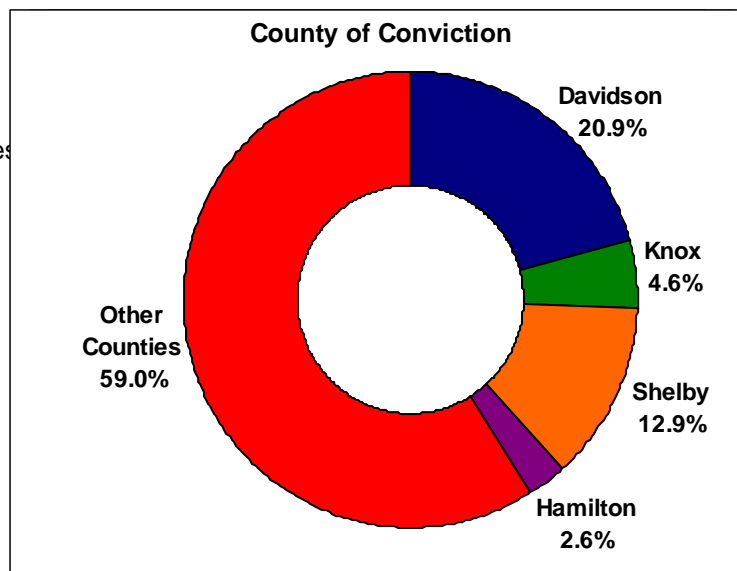

### **Stock Highlights on June 30, 2003**

- Total number of offenders - 27,075
  - TDOC 70.9%
  - Backup 11.3%
  - Local jail 14.4%
  - Other 3.4%
- The sex of the offender was
  - Male 92.2%
  - Female 7.8%
- The race of the offender was evenly distributed between
  - Caucasian 49.6%
  - Black 48.9%
- The admission age of the offender ranged from 16 years to 84 years, the average age of an offender was 34.5 years
- On June 30, 2003, the two most common primary offenses were
  - Drug/Narcotic 17.2%
  - Robbery 15.1%
- Most of the offenders were convicted in Shelby County (41.2%)
- The average sentence length was 12.0 years
  - The average sentence length for an offender with a primary drug offense was 8.7 years
- The average time served is 3.7 years
  - The average time served for a primary drug offense was 2.3 years
- Average number of offenses committed by an offender ranged from 1 to 141, with an average number of 3.8 counts
- Thirteen (12.9%) percent of the offenders committed drug offenses **only**

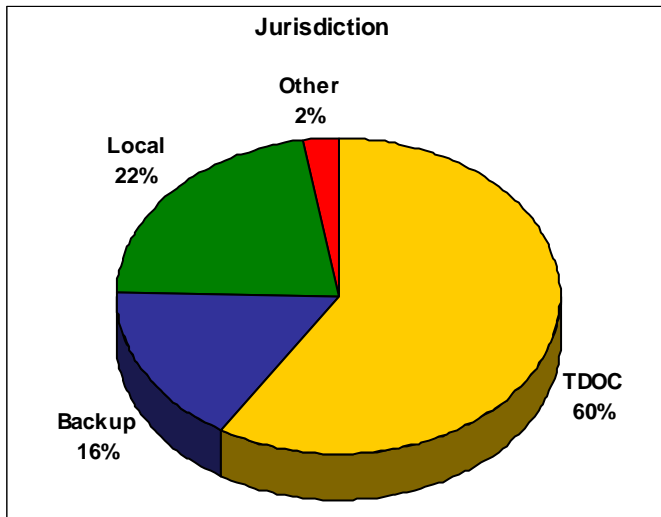

*For additional stock data see Appendix G.*

### **Drug Stock Highlights on June 30, 2003**

Drug/narcotic offenses were the most common primary offense for an offender incarcerated in a TDOC facility or local jail. On June 30, 2003, *any felony drug offense for this incarceration is considered a drug stock*. If more than one drug offense is available, only the most serious drug offense is selected.

- Three fifths (60%) of the offenders were incarcerated in a TDOC facility

Jurisdiction	Total	%
TDOC	3415	60.0
Backup	947	16.4
Local	1293	22.3
Other	137	2.4
	5792	100.0

## Appendix C

### Criteria for Classification

The federal government has five general classifications (or "schedules") for drugs. The Controlled Substance Act places all substances that are regulated under existing federal law into one of five schedules. This placement is based upon the substance's medicinal value, harmfulness, and potential for abuse or addiction. Schedule I is reserved for the most dangerous drugs that have no recognized medical use, while Schedule V is the classification used for the least dangerous drugs. The state of Tennessee has made modifications to the five general classifications and added two additional schedules. Tennessee classifies drugs under seven schedules.

#### SCHEDULE I

- The drug or other substance has a high potential for abuse.
- The drug or other substance has no currently accepted medical use in treatment in the United States.
- There is a lack of accepted safety for use of the drug or other substance under medical supervision.

#### SCHEDULE II

- The drug or other substance has a high potential for abuse.
- The drug or other substance has a currently accepted medical use in treatment in the United States or a currently accepted medical use with severe restrictions.
- Abuse of the drug or other substances may lead to severe psychological or physical dependence.
  - Marijuana, but only for the use of certified patients under the Controlled Substances Therapeutic Research Act, compiled in title 68, chapter 52 [repealed];
  - Marijuana shall be considered a Schedule II controlled substance only for the purposes enumerated in the Controlled Substances Therapeutic Research Act, compiled in title 68, chapter 52 [repealed];

#### SCHEDULE III

- The drug or other substance has a potential for abuse less than the drugs or other substances in schedules I and II.
- The drug or other substance has a currently accepted medical use in treatment in the United States.
- Abuse of the drug or other substance may lead to moderate or low physical dependence or high psychological dependence.

#### SCHEDULE IV

- The drug or other substance has a low potential for abuse relative to the drugs or other substances in schedule III.
- The drug or other substance has a currently accepted medical use in treatment in the United States.
- Abuse of the drug or other substance may lead to limited physical dependence or psychological dependence relative to the drugs or other substances in schedule III.

#### SCHEDULE V

- The drug or other substance has a low potential for abuse relative to the drugs or other substances in schedule IV.
- (B) The drug or other substance has a currently accepted medical use in treatment in the United States.
- Abuse of the drug or other substance may lead to limited physical dependence or psychological dependence relative to the drugs or other substances in schedule IV.

## Planning and Research Drug Brief

### SCHEDULE VI.

The controlled substances included in Schedule VI are:

- Marijuana;
- Tetrahydrocannabinols; and
- Synthetic equivalents of the substances contained in the plant, or in the resinous extractives of Cannabis, sp. and/or synthetic substances, derivatives, and their isomers with similar chemical structure and pharmacological activity, such as the following:
  - 1 cis or trans tetrahydrocannabinol, and its optical isomers;
  - 6 cis or trans tetrahydrocannabinol, and its optical isomers; or
  - 3, 4 cis or trans tetrahydrocannabinol, and its optical isomers.
- Since nomenclature of these substances is not internationally standardized, compounds of these structures, regardless of numerical designation of atomic positions covered.

### SCHEDULE VII

There is hereby established a Schedule VII for the classification of substances which should not be included in Schedules I through VI. The controlled substance included in Schedule VII is Butyl nitrite and any isomer thereof.

## Appendix I

### Drug Fact Sheet

- Heroin is derived from morphine and affects the brain's pleasure systems and interferes with the brain's ability to perceive pain.
  - Big H, Blacktar, Brown sugar, Dope, Junk, Mud, Smack are slang/street names.
  - It is a white to dark brown powder or tar-like substance.
  - It can be injected into a vein (mainlining) or into a muscle, smoked in a water or standard pipe, mixed in a marijuana joint or regular cigarette, inhaled as smoke through a straw, or snorted via the nose.
- LSD is one of the most potent mood-changing chemicals. It is manufactured from lysergic acid, which is found in ergot, a fungus that grows on rye and other grains.
  - Acid, Doses, Hits, Sugar cubes are slang/street names.
  - It is a colored tablet, a blotter liquid, a clear liquid, or thin squares of gelatin.
  - It can be taken orally and licked off blotter paper. Gelatin and liquid can be put in the eyes.
- Methacathinone is made from a mixture of battery acid, Drano, and over the counter asthma medication.
  - Bathtub speed, Cadillac express, Cat, Wildcat are slang/street names.
  - It is a white or off-white crystalline powder.
  - It is commonly snorted, but can be mixed in liquids, intravenous injection, and smoking it either in a crack pipe or added to tobacco or marijuana cigarettes.
- Alcohol can be legally purchased and is the most commonly used and widely abused psychoactive drug in the country.
  - Types of alcohol are beer, wine, and liquor.
  - Booze is a slang/street name.
  - It is in a liquid form and drunk.
- Amphetamines are drugs that are a stimulant to the central nervous system.
  - Bennies, Black beauties, Uppers, Speed are slang/street name
  - It is a colorless pill or tablet.
  - It may be inhaled, injected, or swallowed.
- Barbiturates are prescription sedatives. Commonly called "sleeping pills" or downers and often used on the street in combination with stimulants such as cocaine, amphetamines, and crystal meth/crank.
  - Barbs, Block busters, Christmas trees and Yellow jackets are slang/street name.
  - It comes in multi-colored tablets or capsules.
  - It is swallowed or injected.
- Cocaine is a drug extracted from the leaves of the coca plant. It is a potent brain stimulant and one of the most powerfully addictive drugs.
  - Big C, Blow, Coke, Flake, Lady, Nose candy, Snow, Snowbirds, White Crack, Freebase, and Rock are slang/street names.
  - It is distributed on the street in two main forms: cocaine hydrochloride is a white crystalline powder and "crack" is cocaine hydrochloride that has been processed with ammonia or sodium bicarbonate (baking soda) and water into a freebase cocaine - chips, chunks, or rocks.
  - It can be snorted or dissolved in water and injected. Crack can be smoked.
- Crystal Methamphetamine is a very pure, smokeable form of methamphetamine. It is an extremely addictive stimulant.
  - Ice is the street/slang name.
  - It is clear crystal chunks, like ice.
  - It is usually smoked, sometimes snorted or injected.

## Planning and Research Drug Brief

- MDMA 3,4-methylenedioxymethamphetamine also referred to as Ecstasy is a synthetic drug with amphetamine-like and hallucinogenic properties.
  - Adam, Bean, E, Ecstasy, M, Roll, X, XTC are the street/slang names.
  - It is in a tablet form that is often branded, e.g. Playboy bunnies, Nike swoosh, CK.
  - It is taken in pill form, users sometimes take Ecstasy at "raves," clubs, and other parties to keep on dancing and for mood enhancement. Raves are large all-night dance parties held in unusual settings, such as warehouses or railroad yards, that feature computer-generated, high volume, pulsating music.
- Herbal ecstasy is a term used to describe a combination of herbs that are legal, inexpensive, and marketed as a "natural high." Herbal ecstasy can be purchased over the counter in drug stores, music stores, and shops around the country.
  - Cloud 9, Rave Energy, Ultimate Xphoria, X are the street/slang names.
  - It is sold in colorful packaging. The packaging on these products, including brand names "Herbal Ecstasy," "Cloud 9" and "Ultimate Xphoria," promises "increased energy," "inner visions," "sexual sensations," and "cosmic consciousness."
  - It is swallowed, snorted, or smoked.
- Inhalants are ordinary household products that are inhaled or sniffed by children to get high. There are hundreds of household products on the market today that can be misused as inhalants.
  - Examples of products kids abuse to get high include model airplane glue, nail polish remover, cleaning fluids, hair spray, gasoline, the propellant in aerosol whipped cream, spray paint, fabric protector, air conditioner fluid (freon), cooking spray and correction fluid.
  - These products are sniffed, snorted, bagged (fumes inhaled from a plastic bag), or "huffed" (inhalant-soaked rag, sock, or roll of toilet paper in the mouth) to achieve a high. Inhalants are also sniffed directly from the container.
- Ketamine hydrochloride is a central nervous system depressant and a rapid-acting general anesthetic. It has sedative-hypnotic, analgesic, and hallucinogenic properties. It is marketed in the US and a number of foreign countries for use as a general anesthetic in both human and veterinary medical practice.
  - Breakfast cereal, Date rape drug, Ketaject, Ketalar, New Ecstasy, Psychedelic heroin, Special-K, Super-K, Vitamin K are the street/slang names.
  - It is a white powder, similar to cocaine.
  - It is normally found in liquid injectable form, it is converted into a powder and re-packaged in small ziplock bags or capsules. Ketamine is generally snorted but is sometimes sprinkled on tobacco or marijuana and smoked. Special K is frequently used in combination with other drugs, such as Ecstasy, heroin, and cocaine.
- Marijuana is the most often used illegal drug in this country. It is a product of the hemp plant, Cannabis sativa. The main active chemical in marijuana, also present in other forms of cannabis, is THC (delta-9-tetrahydrocannabinol). Of the roughly 400 chemicals found in the cannabis plant, THC affects the brain the most.
  - Aunt Mary, Gangster, Grass, Hash, Herb, Mary Jane, Pot, Reefer, Sinsemilla, and Weed are street/slang names.
  - It is a green or gray mixture of dried, shredded flowers and leaves of the hemp plant (Cannabis sativa).
  - It is mostly rolled into a cigarette called a "joint". It can be smoked in a water pipe, called a "bong", or mixed into food or brewed as tea. It has also appeared in cigars called "blunts".
- Methamphetamine is an addictive stimulant drug that strongly activates certain systems in the brain.
  - Chalk, Crank, Croak, Crypto, Crystal, Fire, Glass, Meth, Speed, White Cross, and Tweek are street /slang names.
  - It is a crystal-like powdered substance that sometimes comes in large rock-like chunks. When the powder flakes off the rock, the shards look like glass, which is another nickname for meth. Meth is usually white or slightly yellow, depending on the purity.
  - It can be taken orally, injected, snorted, or smoked.

## Planning and Research Drug Brief

- PCP or phencyclidine, is a dissociative drug that was developed in the 1950s as a surgical anesthetic. Its sedative and anesthetic effects are trance-like, and patients experience a feeling of being "out of body" and detached from their environment. Use of PCP in humans was discontinued in 1965, because it was found that patients often became agitated, delusional, and irrational while recovering from its anesthetic effects.
  - Angel Dust, Embalming Fluid, Killer Weed, Rocket Fuel, and Supergrass are street/slang names.
  - It is a white crystalline powder that is readily soluble in water or alcohol. It has a distinctive bitter chemical taste.
  - It turns up on the illicit drug market in a variety of tablets, capsules, and colored powders. It is normally used in one of three ways -- snorted, smoked, or eaten. When it is smoked, PCP is often applied to a leafy material such as mint, parsley, oregano, tobacco or marijuana. Many people who use PCP may do it unknowingly because PCP is often used as an additive and can be found in marijuana, LSD, or methamphetamine.
- Steroids(Anabolic) are a group of powerful compounds closely related to the male sex hormone testosterone. Current legitimate medical uses include treatment of certain kinds of anemia, severe burns, and some types of breast cancer. Body builders, long-distance runners, cyclists and various other athletes who claim that steroids give them a competitive advantage and/or improve their physical appearance use these drugs illegally.
  - Juice and Rhoids are the street/slang names.
  - It comes in tablets or liquid form.
  - It is taken orally or injected, and athletes and other abusers take them typically in cycles of weeks or months, rather than continuously, in patterns called cycling. Cycling involves taking multiple doses of steroids over a specific period of time, stopping for a period, and starting again. In addition, users frequently combine several different types of steroids to maximize their effectiveness while minimizing negative effects, a process known as stacking.

Drug fact sheet information was obtained from [www.drugfreeamerica.org/Drug\\_Resource/](http://www.drugfreeamerica.org/Drug_Resource/).
